ABSTRACT

This template helps you to create a properly formatted L^AT_EX manuscript. This template helps you to create a properly formatted L^AT_EX manuscript. This template helps you to create a properly formatted L^AT_EX manuscript. This template helps you to create a properly formatted L^AT_EX manuscript.

1. Introduction

1. The enumerate environment starts with an optional argument '1.' so that the item counter will be suffixed by a period as in the optional argument.
2. If you provide a closing parenthesis to the number in the optional argument, the output will have closing parenthesis for all the item counters.
3. You can use '(a)' for alphabetical counter and '(i)' for roman counter.
 - a) Another level of list with alphabetical counter.
 - b) One more item before we start another.
 - (i) This item has roman numeral counter.
 - (ii) Another one before we close the third level.
 - c) Third item in second level.
4. All list items conclude with this step.

I don't know what it is.

Maybe later I will know.

So I keep it here.

Nam dui ligula, fringilla a, euismod sodales, sollicitudin vel, wisi. Morbi auctor lorem non justo. Nam lacus libero, pretium at, lobortis vitae, ultricies et, tellus. Donec aliquet, tortor sed accumsan bibendum, erat ligula aliquet magna, vitae ornare odio metus a mi. Morbi ac orci et nisl hendrerit

*This document is the results of the research project funded by the National Science Foundation.

**The second title footnote which is a longer text matter to fill through the whole text width and overflow into another line in the footnotes area of the first page.

This note has no numbers in front.

*Corresponding author

**Principal corresponding author

¹This is the first author footnote, but is common to third author as well.

²Another author footnote, this is a very long footnote and it should be a really long footnote. But this footnote is not yet sufficiently long enough to make two lines of footnote text.
